ABSTRACT

Analyses of spring term (both quarter and semester) 1978 student enrollment data, and winter quarter enrollment data for the five Illinois community college districts on the quarter system, comprise this report. Information is organized in thirteen data tables comparing spring 1978 with fall and spring 1977, second term enrollment with previous years, winter 1978 headcount with winter 1977, and winter 1978 full-time equivalent (FTE) with winter 1977 enrollments; and presenting spring 1978 data by course type, instructional program area by student residency, and enrollment in instructional programs by college. During spring 1978, 298,597 students were enrolled, a 7% decrease from the previous year and an 11% decrease from fall 1977. FTE enrollments totaled 138,094 in spring 1978, an 8% decrease from spring 1977 and a 15% decrease from fall 1977. In spring 1978, the baccalaureate/general academic category had the largest FTE enrollment (51.3%), followed by business and public service (16.5%), remedial/developmental (9.3%), and natural science and industrial technology (9%). In-district students composed 95.2% of total enrollment; only 0.2% were out-of-state students. On-campus enrollment involved 81% of spring 1978 students; in-district, off-campus locations involved 18.4%, and extension/home-study accounted for the remaining 0.6%. (TR)

HIGHLIGHTS

1. The community colleges of Illinois enrolled 298,597 students during spring 1978, a 7% decrease from a year ago and a decrease of 11% from the fall 1977 term. (For details, see pages 4 and 5.)

2. FTE student enrollment totaled 138,094 for the spring 1978 term, a decrease of 8% from the spring 1977 term and a decrease of 15% from the fall 1977 term. (For details, see page 6).

3. Of the five community college districts having a quarter calendar system, three of these districts showed increases in their student headcount enrollment for the 1978 winter term from a year earlier while only two districts showed increases in FTE enrollments for the winter term. (See pages 8 and 9 for details.)

4. During spring 1978 term, the FTE enrollment by type of course showed that the Baccalaureate/General Academic category had the largest FTE enrollment (70,745 - 51.3% of the total). The enrollments by the other categories were as follows: Business and Public Service Tech. (22,849 - 16.5%); Data Processing and Commerce Tech. (5,761 - 4.2%); Natural Science and Industrial Tech. (12,402 - 9.0%); Health Tech. (6,832 - 4.9%); Vocational Skills (3,273 - 2.4%); Remedial/Developmental (12,816 - 93%); and General Studies (3,368 - 2.4%). (For details see page 10.)

5. In-district students composed 95.2% of the total student enrollment in the community colleges of Illinois with 4.6% of the students being from Illinois but out-of-district and only 0.2% of the students enrolled are from out-of-state. (See page 12 for details.)

6. Enrollment at on-campus locations accounted for 81.0% of the total spring 1978 term enrollment with enrollment at in-district off-campus locations accounting for 18.4% of the total, and Extension/Homestudy locations accounting for only 0.6% of the total enrollment. (See page 14 for details.)

INTRODUCTION

This report contains an analysis of spring term enrollments (both spring quarter and spring semester) and winter quarter enrollments for the five community college districts on the quarter system. In previous years, the winter and spring term enrollment report consisted of second term enrollments, (winter quarter for those colleges on the quarter system, and spring semester for those on the semester system).

It is always difficult to report winter and spring term enrollments in the community colleges of Illinois because of the many different types of calendar systems being used by the 51 community colleges and the great variety of starting dates. In addition to the quarter and semester systems, some colleges have a one month session between their two semester terms, one college uses a monthly module system, a number of colleges have half-semester modules as well as a regular semester module, and almost all colleges have courses that start and stop throughout the term.

Student enrollment data for the Winter Quarter and Spring Term 1978 are based on 10th day (end of registration) counts. This type of enrollment data is considered to be "snapshot" enrollment. Snapshot enrollment counts reflect the number of students attending a given institution on a particular date. Usually, the winter and spring term enrollment at institutions of higher education are somewhat lower than the fall term enrollment for the same year. This has generally been the case in Illinois public community colleges as well.

The winter and spring term enrollments are very important because when combined with the fall term enrollments, they provide a very good indication of the total enrollments generated by each college for the entire year. These data are significant to each college as well as to the ICCB because the annual enrollments determine the amount of state funding that public community colleges receive.

It should be noted that in several cases the two full-time equivalent (FTE) course enrollment tables which each college submitted sometimes showed slightly different figures from those which were obtained from the E-1 card reports. In those cases the figures on the tables distributed by course enrollments were changed to match the E-1 card reports. In two instances, the E-1 card reports were changed to match the course enrollment FTE figure. Some colleges submitted all tables on forms and, in these instances, the figures on the forms were utilized.

COMPARISON OF 1978 SPRING TERM ENROLLMENTS WITH FALL TERM 1977 AND SPRING TERM 1977 ENROLLMENTS

Table 2 on the following page shows a comparison of spring term 1978 headcount enrollment with fall 1977 and spring 1977 terms. Of the fifty-one community colleges, eleven colleges experienced an increase in enrollment from fall 1977 to spring 1978 term, while forty had decreased in enrollment. Nineteen of the fifty-one colleges showed increases from spring 1977 term to spring 1978 term and thirty had decreases in enrollment. Two colleges, Chicago City-Wide College and Illinois Eastern Frontier Community College, are new colleges and were not in operation during the spring 1977 term. Therefore, no comparison is shown for these colleges. The total spring 1978 headcount enrollment (298,597) has decreased 10.5% from fall 1977 and 6.9% from the spring 1977 term.

Table 3 on page 6 shows the FTE student enrollment for spring 1977, fall 1977, and spring 1978 terms for each of the public community colleges of Illinois. Only three community colleges experienced increases in FTE enrollment from fall 1977 to spring 1978 term while forty-eight colleges showed a decrease. Of the fifty-one colleges, ten had an FTE enrollment increase from spring 1977 to spring 1978 term, thirty-nine had decreases, and two colleges, Chicago City-Wide College and Illinois Eastern Frontier Community College, were not in operation during spring 1977 term. The total FTE enrollment (138,094) has decreased 14.5% from fall 1977 term and 8.4% from spring 1977 term.

Table 1 below shows a summary of the statewide headcount and FTE enrollment reported for spring 1978 term compared with fall 1977 and spring 1977 term.

COMPARISON OF SECOND TERM ENROLLMENTS WITH PREVIOUS YEARS

Since this report utilized second term (winter quarter and spring semester) enrollments in past years, this year's data can be analyzed in a similar format to provide a comparison with past years. Table 4 below shows the second term student headcount and FTE enrollments for the public community colleges of Illinois since FY1974. This analysis shows that although the headcount enrollment has been increasing prior to FY1978, the rate of increase has been declining. The FTE enrollment has been decreasing for the past two years. Second term FY1978 is the first time during the past five years that both headcount and FTE student enrollments have decreased.

COMPARISON OF WINTER QUARTER 1978 HEADCOUNT ENROLLMENT WITH WINTER QUARTER 1977 ENROLLMENT

Table 5 below shows a comparison of the headcount enrollment data for winter quarter 1978 with headcount enrollment data for winter quarter 1977 for each Illinois public community college on the quarter system. A slight increase was experienced in headcount enrollment (1.2%) during winter term 1978 by all these colleges. A total of 26,229 headcount students were enrolled during winter quarter 1978.

SPRING TERM 1978 10TH DAY FTE BY TYPE OF COURSE

Table 10 on the next page shows the spring term 1978 10th day FTE enrollment by the eight funding categories for each of the public community colleges in Illinois. The distribution into the various categories was based on type of course. Of the 138,046 FTE students reported, the baccalaureate and general academic category generated the greatest enrollment (70,745 FTE - 51.3% of the total).

Table 9 below shows a summary of the actual spring term 1978 FTE enrollment by type of course.

SPRING TERM ENROLLMENTS IN INSTRUCTIONAL PROGRAM AREA BY RESIDENCY OF STUDENT

Table 12 on the opposite page shows the headcount and FTE enrollment in the instructional program areas by type of residency for each of the public community colleges of Illinois. Out-of-district enrollment includes both students from other community college districts and students from high school districts that are not a part of a community college district. Out-of-district students attend on either a chargeback basis or else pay their own additional out-of-district tuition. Both in-district students and out-of-district students are from Illinois. Less than one percent (0.2%) of the students enrolled in Illinois public community colleges are from out-of-state. The large majority of students (95.2%) are residents of the community college district that they attend.

Table 11 below shows a summary of the enrollment data by residency.

SPRING TERM 1978 FTE ENROLLMENT IN INSTRUCTIONAL PROGRAM AREAS BY LOCATION

Table 14 on the opposite page shows the FTE enrollment in instructional program areas distributed by location of attendance for each of the public community colleges of Illinois. On-campus attendance represents courses being offered in facilities which are a part of the college campus. Off-campus attendance is enrollment in courses which are offered at the various high schools and other extension centers within the district. Extension attendance is in courses which are offered at locations outside the college districts.

Table 13 below shows a summary of student FTE enrollment in instructional program areas by location.
